# AIRMAIL

VOLUME 28 :: ISSUE 09 :: SEPTEMBER :: 2016

## FENCE REPAIR

Prior to last month's meeting, a few phone calls and E-mails changed hands to alert us all about the poor condition of the fence that runs along Road 189. It so happens that the weeds, bushes and vines had worked their way through the fence and pushed it away from the support posts from the entrance gate to almost the tree line to the north. So, at last meeting we decided to call an unscheduled field repair day to remedy the situation. The following is a copy of Ricks E-mail talking about the project.

"The field day was a success. All of the intended improvements and repairs were made. We had several show up to help. The brush was cleared, loaded and secured by noon. We had lunch and soon after the first plane hit the air. A small detail of us went out and put the ties on the fence and maybe twenty minutes later that was done, then more planes took to the air. The runway got swept off and a fair rain will finish up the job. I finished up my day with the final flight off of the pond before removing the plugs. All in all a good, successful, enjoyable day. Thanks to the group effort! See you soon Rick."

## MARK YOUR CALENDAR

There will be an Octoberfest RC fun fly at Hammer Field in Eureka Springs, Arkansas. It will be a three day event starting on Friday, October 21st and ending Sunday, the 23rd.

As the circular says, NO Helos or 3D planes. Food and beverage will be available all three days.

If you are interested in attending, the details are available at :

## NOTICE:

If you haven't been to the field since September 10, the float fly pond has been drained for the season.

This will allow cutting and treating of any plant life protruding that will cause a problem with the water surface. (It will also keep the geese from pooping on the runway).
